FOREWORD

These *Recommended Practices for Installation of Underground Liquid Storage Systems* have been prepared as an industry service by the Petroleum Equipment Institute. This recommended practice is truly an industry document, as PEI members, environmental regulators, oil company engineers, oil marketing trade associations, etc., have had an opportunity to review and comment on the previous publication under the same name. The text represents the consensus views of the PEI Tank Installation Committee, comprised of the following members:

Blake Bammer, Chairman

JF Petroleum Group
Morrisville, North Carolinaa

Carl E. Bayliss, II

B C & C LLC
Winchester, Virginia

Chris Collura

Guardian Fueling Technologies
Jacksonville, Florida

Ryan Haerer

U.S. Environmental Protection Agency
Washington, DC

Gina M. Jaimes

McCon Building and Petroleum Services Inc.
Fate, Texas

Michael Mizicko

Western Pump Inc.
San Diego, California

David J. Piercy

JD2 Environmental Inc.
West Chester, Pennsylvania

Peter Rollo

DNREC-Tank Management Branch
New Castle, Delaware

Jimmy Spiros

Neumayer Equipment Co.
Saint Louis, Missouri

Bret Swan

Minnesota Petroleum Service Inc.
Minneapolis, Minnesota

Previously serving as consultant to the committee was Kevin Henderson, Kevin Henderson Consulting LLC, 59 Summit Place, Brandon, MS, 39042.

The PEI Tank Installation Committee acknowledges the contributions to past editions of this document by the following people: Leland Freeman, John G. Dzwonczyk, O. L. Everett, John P. Hartmann, Maurice J. Hubbard, Frank Johnson, Marcel Moreau, J. H. Prentiss, Jr., Robert Renkes, Patrick M. Ryan, Jerry A. Thomas, Howard Upton and George H. Watkins.

This document supersedes and replaces the previous recommended practice entitled, *Recommended Practices for Installation of Underground Liquid Storage Systems*, PEI/RP100-2017.

All questions and other communications relating to this document should be sent only to PEI Headquarters, addressed to the attention of the PEI Tank Installation Committee.

SECTIONS

	Page
1. Introduction	
1.1 Background.....	1
1.2 Purpose.....	1
1.3 Scope.....	1
1.4 Sources	1
1.5 Use of Other PEI Recommended Practices.....	1
1.6 Importance of Competent Installers	1
1.7 Written Plans.....	2
1.8 Unexpected Conditions.....	2
1.9 Corrosion Concerns	2
1.10 Regulations	2
2. Materials Handling.....	3
2.1 Care in Handling Tanks.....	3
2.2 Unloading, Lifting and Lowering	3
2.3 Tank Storage.....	3
2.4 Piping and Equipment Storage.....	3
3. Preinstallation Inspection and Tank Testing	4
3.1 Preinstallation Inspection	4
3.2 Preinstallation Tank Testing	5
3.3 Preinstallation Testing of Double-Walled Tanks.....	5
3.4 Preinstallation Testing of Compartmented Tanks	6
3.5 Alternative Interstice Tests.....	6
3.6 Double-Walled Tank With Liquid-Filled Interstice	6
3.7 Double-Walled Tank With Vacuum on Interstice.....	6
4. Earthwork.....	7
4.1 Earthwork	7
4.2 Excavation Location.....	8
4.3 Excavation Depth, Bedding and Backfill.....	8
4.4 Cover in Areas Subject to Traffic.....	8
4.5 Cover in Areas Not Subject to Traffic	8
4.6 Maximum Burial Depths.....	9
4.7 Handling of Excavated Materials.....	9
4.8 Work Area Safety	9
4.9 Used Tank Excavation.....	9
5. Backfilling	10
5.1 General	10
5.2 Ballasting.....	10
5.3 Water Management.....	10
5.4 Backfill Material for Steel, Composite (Fiberglass-Clad Steel) and Jacketed Tanks.....	10
5.5 Backfill Placement for Steel, Composite and Jacketed Tanks.....	10
5.6 Backfill Material for Fiberglass Tanks.....	11

5.7	Backfill Placement for Fiberglass Tanks.....	11
5.8	Compaction	12
5.9	Measuring Tank Deflection.....	12
5.10	Filter Fabric	12
5.11	Supporting Equipment During Construction	12
6.	Anchoring.....	13
6.1	General	13
6.2	Excavating Requirements.....	13
6.3	Wet-Hole Conditions.....	13
6.4	Anchorage Types.....	13
6.5	Straps	14
6.6	Electrical Isolation.....	15
6.7	Attachment Methods	15
7.	Spill Containment and Overfill Prevention	16
7.1	Purpose	16
7.2	Spill Containment.....	16
7.3	Overfill Prevention.....	16
7.3.1	Alarms	16
7.3.2	Flow Shutoff Devices.....	17
7.4	Overfill Device Installation.....	17
8.	Secondary Containment	18
8.1	Purpose	18
8.2	Double-Walled Spill Buckets.....	18
8.3	Double-Walled Tanks	18
8.4	Double-Walled Piping	18
8.5	Containment Sumps	18
8.5.1	Tank-Top Sumps	19
8.5.2	Dispenser Sumps.....	19
8.5.3	Transition Sumps	19
8.5.4	Containment Sump Testing.....	19
8.6	Safety Considerations.....	20
9.	Leak Detection	21
9.1	Purpose	21
9.2	Double-Walled Tank Leak Detection.....	21
9.2.1	Interstitial Monitoring of Steel and Composite Tanks.....	21
9.2.1.1	Manual Interstitial Monitoring of Steel and Composite Tanks.....	21
9.2.1.2	Electronic Interstitial Monitoring of Steel and Composite Tanks	21
9.2.2	Interstitial Monitoring of Fiberglass Tanks.....	21
9.2.2.1	Manual Interstitial Monitoring of Fiberglass Tanks.....	21
9.2.2.2	Electronic Interstitial Monitoring of Fiberglass Tanks	21
9.3	Double-Walled Piping Leak Detection	22
9.3.1	Secondary Containment Monitoring.....	23
9.3.1.1	Manual Secondary Containment Monitoring	23
9.3.1.2	Electronic Secondary Containment Monitoring.....	23
9.3.2	Interstitial Monitoring	23
9.3.2.1	Manual Interstitial Monitoring	23
9.3.2.2	Electronic Interstitial Monitoring	24
9.3.3	Automatic Line Leak Detectors.....	24
9.3.4	Satellite Dispenser Piping	24
9.3.5	Under-Pump Check Valve.....	24

10. Piping and Fittings.....	25
10.1 General Requirements for Product Piping	25
10.2 Piping Materials	25
10.3 Piping Practices	25
10.4 Piping Layout and Trenches.....	25
10.5 Piping Backfill and Compaction.....	26
10.6 Flexible Connectors.....	26
10.7 Threaded Joints	26
10.8 Metallic Piping	27
10.9 Fiberglass Piping	27
10.10 Flexible Piping	28
10.11 Containment Sumps	28
10.12 Vent Piping	28
10.13 Fill Piping.....	28
10.14 Submersible Pump.....	29
10.15 Suction Stub	29
10.16 Emergency Shutoff Valves	29
10.17 Manifolded Tanks and Siphon Piping.....	30
10.18 Vapor Recovery Piping	30
10.19 Water Gauging Port.....	30
10.20 Manhole Identification	30
11. Testing Piping.....	31
11.1 Testing of Product Piping.....	31
11.1.1 Initial Test for Single-Walled Piping	31
11.1.2 Initial Test for Coaxial Piping	31
11.1.3 Monitoring During Construction	31
11.1.4 Post-Construction Testing	31
11.2 Testing Secondary Containment Piping	31
11.2.1 Initial Test for Secondary Piping	31
11.2.2 Monitoring During Construction	31
11.2.3 Final Integrity Test for Secondary Piping.....	32
12. Cathodic Protection Systems	33
12.1 General Requirements	33
12.2 Applicability.....	33
12.3 Factory-Installed Systems for Tanks	33
12.4 Dielectric Coatings.....	33
12.5 Electrical Isolation.....	33
12.6 Galvanic Anodes for Piping	34
12.7 Impressed-Current Systems.....	34
12.8 Test Stations	35
12.9 Wiring and Electrical Connections	35
12.10 Piping	35
12.11 Protecting Piping	35
12.12 Field-Applied Coating.....	36
12.13 Other Components.....	36
12.14 Inspection and Testing.....	36
13. Electrical Installation	37
13.1 Importance of Electrical Work	37
13.2 General Requirements	37
13.3 Leak Detection and Cathodic Protection Systems	37

14. Testing	38
14.1 System Tests	38
14.2 Cathodic Protection Systems.....	39
14.3 Test Results	39
14.4 Other Testing	39
15. Documentation and Training.....	40
15.1 ‘As-Built’ Drawings	40
15.2 Component Documentation.....	40
15.3 Installation Checklists	40
15.4 Scheduled Inspections and Maintenance	40
15.5 Training	40
Appendix A: Floatout and Anchorage Calculations	41
A.1 Purpose	41
A.2 Weight of Materials.....	41
A.3 Reflected-Tank Area.....	41
A.4 Tank Displacement	41
A.5 Reinforced Concrete Pad at Finished Grade.....	41
A.6 Depth of Burial to Top of Tank.....	41
A.7 Volume and Weight of Overburden.....	41
A.8 Adequacy of Restraining Forces	42
A.9 Calculation of Safety Factor	42
A.10 Effect of Adding 1 Foot to Burial Depth	43
A.11 Applicability	43
Appendix B: Background: Cathodic Protection	44
B.1 Galvanic Corrosion	44
B.2 Stray-Current Corrosion.....	44
B.3 Rate of Corrosion	44
B.4 Coatings.....	44
B.5 Cathodic Protection	44
B.6 Impressed-Current Systems.....	44
B.7 Galvanic Anodes	45
B.8 Anode Backfill Material.....	45
B.9 Magnesium Anode Selection.....	45
B.10 Calculation of Anode Life.....	45
B.11 Number of Feet of Well-Coated Steel Pipe Protected With One Galvanic Anode.....	46
B.12 Adjusting Factors for Anodes Installed in Parallel	46
Appendix C: Publication Reference	47
